Delight new hires.

HR professionals know that a significant number of new employees decide whether they will stay or leave your company within their first six months. Engaging employees from their first interaction with your business can mean the difference between long-term retention and wasted time, productivity and money. However, many organizations treat onboarding as another line item on a long, mundane checklist. Technology onboarding can be the first opportunity you have to make a good impression on new hires – why not make the experience great?

Our solution

Imagine you accepted a new, remote role and you start this coming Wednesday. On Monday, you receive a box at your door, branded with your new company's logo. When you open it, you find everything you need to get started in your new role including your laptop, keyboard, mouse, headset, and even a couple of branded tchotchkes for your desk, such as a travel mug and a t-shirt.

But the experience doesn't end there. There's no need to go into an office to set up your computer or even call the service desk. Instructions for log in are included with a welcome brochure, with information about logging into your laptop for the first time to be prepared for your first day.

Insight's provisioning and deployment services provide this experience for our clients every day. Our experts will work with you to determine your goals and new-hire onboarding needs – to provide a welcome kit experience that will make your new hires feel great about their choice to join your organization.

Choose your new-hire experience.

Let our experienced professionals work with your teams to define the ultimate new-hire experience kit. Our provisioning and deployment services make it easy to provide the best experience possible, determined by defining the items below.

1 Login experience

Want to give your users a "consumer" experience? Zero-touch, white glove pre-provisioning services ensure that devices arrive ready to go with minimal setup time.

2 Technology kit

Select tech bundles based on user profiles from an extensive list of options for:

- Laptops / desktops
- Mobile phones
- Monitors
- Keyboards and mice
- Webcams and headsets
- Immersive devices

3 Add-ons

Show new hires you go the extra mile with thoughtful add-ons such as:

- Backpacks and briefcases
- Power accessories
- Docking stations

4 Your branding

Include creative options that make your brand shine. Some great options we've seen include:

- Welcome letters and brochures
- Employee handbooks
- Branded swag
- Access keys
- Gift cards

A better way to buy IT

OEM partnerships

We unite the capabilities of more than 6,000 leading technology partners and over 600,000 products to deliver device solutions that are right for your business. Our experts will work with you to define the perfect device bundles that welcome employees and even improve the experience for existing users.
