

# RADIUS™ for Devices

Improve and modernize your device ecosystem with expert guidance.

DATA & AI

CLOUD & INFRASTRUCTURE

APPS AND INTEGRATIONS

DIGITAL WORKPLACE

## Drive better device experiences. Increase ROI.

Device ecosystems are complex. Employees expect seamless experiences, while IT struggles with managing complicated, manual processes, aging device management platforms, increased costs, supply chain issues, and more. Most organizations are feeling the urgency to make improvements, from embracing AI PCs to upleveling security. But with tight budgets and a lack of resources and knowledge, it's hard to know where to begin.

### How we help

Insight's RADIUS™ for Devices is designed for organizations who are ready to advance their modernization journey and improve their device ecosystem. Our experts work with you to evaluate everything – from IT asset management processes and current device personas, to UEM tools, device support, end-user experience, procurement, and location logistics. The result: detailed analysis, precise recommendations, and a roadmap for improvement tailored to your needs.

This engagement is ideal for organizations with approximately 1,000 to 15,000 end-user-compute devices.

## Features

Delivered in approximately two weeks, Insight will work with your resources to develop a plan for improvement and modernization in three phases: Discover, Assess, and Report. You'll get deep-dive deliverables presented in a final report-out meeting:

A detailed findings document analyzing current device lifecycle management processes

A tailored set of recommendations that address any identified gaps – with prioritized action items and suggested strategies aligned to best practices

## How you'll benefit

Armed with a roadmap and key priorities to address across your device ecosystem, you'll position your organization for success:

Cut cost.

Simplify device management.

Stay up-to-date and protected.

Create experiences users will love.

Get a clearer view for more precise decision making.

Stay ahead of the technology curve.

# RADIUS™ for Devices

## A process that drives results

Insight's RADIUS™ for Devices identifies gaps and provides actionable recommendations to help optimize and modernize endpoint management and end-user computing environments. Active participation from your resources for meeting planning and discovery is required for best results.

### Discover (60 hours)

The engagement will kick off with an objective alignment workshop and set the stage for discovery activities including:

- Current device ecosystem, process discovery, and data requirements
- Stakeholder interviews

### Assess (20 hours)

Insight will perform analysis of the results from the Discover phase and work to produce final deliverables. Note that Insight resources may require additional meetings and interviews for clarification of information during this time.

### Report (4 hours)

Based on the results of the assessment, Insight will report on the following deliverables in a meeting(s):

- Current findings for device lifecycle management processes highlighting strengths and weaknesses
- Recommendations and proposed solutions addressing the identified gaps

## Why Insight?

Insight Enterprises is a leading Solutions Integrator that helps clients solve technology challenges by combining the right hardware, software, and services. We're a global Fortune 500 technology company with a network of over 6,000 partners and experts around the world who provide access to end-to-end IT capabilities. For more than 35 years, we have delivered and optimized technology solutions for our clients efficiently, effectively, and safely.
