

## Solution Brief

# Well-Architected Multicloud Workshop

Fast-track your journey to multicloud excellence.

## Business challenge

In multicloud environments, organizations often struggle with interoperability, cost control, consistent security measures, and effective data and compliance management. Without a cohesive strategy to multicloud, a host of challenges arise that can hinder operational efficiency, increase complexity, and expose gaps in security.

## How we help

Insight's Well-Architected Multicloud Workshop is a customized session designed to align your unique business requirements with multicloud growth opportunities. Through this collaborative workshop, we'll create an actionable plan that spans everything from cost management to security, governance and more.

## Who should attend?

Led by one or more members of our team of experienced architects, consultants, and solution experts, this workshop delivers the most benefit to your organization's IT and business leaders. The ideal session size is 10 or fewer participants.

IT directors  
and above

Key system  
architects

DevOps  
teams

Business  
owners

Stakeholders  
for business  
workloads

Developers

## Benefits

Create a unified multicloud vision for key stakeholders.

Align cloud priorities with the pillars of Well-Architected: Cost, Security, Operational Excellence, Performance, and Reliability.

Uncover insights & growth opportunities in the multicloud landscape.

Improve your cloud management approach.

Navigate multicloud complexities with a strategic vision and roadmap.

Maximize the benefits and ROI of leveraging multiple cloud providers.

## Navigating your transformation journey

From assessing your current state and defining roadblocks to defining use cases, exploring operating and governance models, digital estate planning and application rationalization — our workshop fully prepares you for a successful build and optimize phase.
