

5 Reasons to Deliver a Hybrid Multicloud Experience With NetApp HCI

Your hyperconverged infrastructure worked well for a while, but it's not performing at scale. Your developers are frustrated with performance issues and are turning to the public cloud for swipe-and-go services. Your budget is ballooning and you need to improve your ROI. Sound familiar? With NetApp[®] HCI, it won't.

Built cloud-first, our hybrid cloud infrastructure solution enables you to deliver a hybrid multicloud experience that seamlessly brings together the best of public cloud and private cloud. NetApp HCI can transform your IT from a cost centre to a service centre that accelerates your business and drives revenue.

With NetApp HCI, you can:

Consolidate workloads

Break down silos and maximise your investment.

Run thousands of workloads, including your enterprise applications, end-user computing, virtual desktop infrastructure, and more on a single platform with guaranteed performance.

Centralise and streamline management

Increase IT Staff productivity and improve business agility.

Free up staff time by simplifying and automating deployment and lifecycle management. Eliminate upgrade hassles while making fewer mistakes. And cut operating costs by up to 67%.

Dynamically scale on demand

Avoid costly and inefficient overprovisioning.

Scale compute and storage independently to simplify capacity and performance planning, reduce your hypervisor footprint, and reduce TCO by as much as 59%.

FREE your data

Move your data from the edge to the core to the cloud.

Integration into your data fabric powered by NetApp means that you can unleash the full potential of your applications, with the data services they require, across any cloud.

Chose your own integrations

Get an agile foundation for your private and hybrid cloud infrastructure.

Whether you use NetApp Kubernetes Service or VMware or Red Hat private cloud stack, or connect containerised workloads to your public cloud vendor, NetApp makes it easy to use the tools you need when you need them.

NetApp creates innovative products; storage systems and software that helps clients around the world store, manage, protect, and retain one of their most precious corporate assets: their data. NetApp are recognised throughout the industry for continually pushing the limits of today’s technology so that NetApp’s clients never have to choose between saving money and acquiring the capabilities they need to be successful.

NetApp find ways to enable customers to do the things they couldn’t do before at a speed they never thought possible. NetApp partner with industry leaders to create the most efficient and cost-effective solutions optimised for their IT needs, and to deliver and support them worldwide.
